Professional Summary

Python Backend Developer with hands-on experience in Django, Django REST Framework (DRF), REST API development, JWT Authentication, and MySQL/PostgreSQL. Completed Python AI/ML training with hands-on experience using NumPy, Pandas, and Scikit-learn. Developed secure, scalable backend applications and REST APIs for live client projects using Django and DRF. Passionate about learning new technologies and writing clean, maintainable code.

SKILLS

- Programming Languages: Python, SQL
- Frameworks: Django, Django REST Framework (DRF), Flask
- Databases: PostgreSQL, MySQL, SQLite3
- API Development: RESTful APIs, CRUD Operations, Stripe Payment Integration, JSON, HTTP Methods
- Authentication: JWT Authentication, Session Authentication, Google OAuth 2.0, RBAC
- Libraries: NumPy, Pandas, Scikit-learn
- Tools: Git, GitHub, Postman, Visual Studio Code
- Concepts: Django ORM, OOP, MVT Architecture, Database Migrations, API Testing, Exception Handling

EXPERIENCE

Python Django Developer

IT Infonity

- Developed REST APIs using Django REST Framework (DRF) for user authentication, profile management, booking modules, and database operations. Implemented JWT Authentication and tested APIs using Postman.
- Collaborated on real-world backend projects involving API development, integration, performance optimization, and version control using Git.

Python Ai/ML intern

Sunfocus Solution Pvt Ltd (June 2025 -Jan 2026)

- Worked on real-world Python and AI/ML projects using NumPy, Pandas, and Scikit-learn for data processing, analysis, problem-solving, and implementing basic machine learning solutions.

PROJECTS

Klean World-Cleaning Service App | Django, DRF

- Developed a Cleaning Service Booking Platform using Django REST Framework (DRF) and built REST APIs for user registration, login, profile management, cleaner booking, cleaner management, and service history.
- Implemented JWT Authentication for secure role-based access for Customer and Cleaner users.
- Integrated Stripe Payment Gateway with webhook support for secure online payments.
- Used MySQL, PostgreSQL, Django ORM, Postman, and Git for developing REST APIs, managing databases, testing APIs, and using Git for version control and tracking code changes.

RoleSync – Role-Based Authentication & Authorization Platform

[GitHub Repo](#)

- Developed a role-based authentication system using Django REST Framework with JWT Authentication, Google OAuth, and separate access for Principal, Teacher, and Student users.
- Built REST APIs using serializers and class-based views, and tested all endpoints with Postman.
- Added email verification, password reset using SMTP, and integrated the backend with a React.js frontend.

Smart Car Purchase Predictor |Python,ML, DRF

[GitHub Repo](#)

- Developed a customer purchase prediction model using Logistic Regression, data preprocessing, and model evaluation.
- Integrated the machine learning model with Django REST Framework (DRF) for real-time API-based predictions.

EDUCATION

Bachelor Of Computer Applications(BCA)

CGPA: 8.1

- Government Post Graduate College, Bilaspur (2022–2025)

CERTIFICATIONS

- AI/ML Certification – Sunfocus Solution Pvt. Ltd.
- Python Django Internship – IT Infonity
